

CARADO, KENTH IAN E.

CHALLENGE #1

GOAL

My goal is to provide every public school from elementary to college a school website. As a student I can say that a school website is a must because in today's generation everything is online and a website can help the users to have an information about the school without going to school directly just to ask for information, just search the school website in the internet and it will provide the information you need.

PLAN

Since this is my first time making this project, I want to start by imitating the appearance of the school website of my previous school since they already have website. With that, I have the inspiration for my first website, I will just add some additional function that will benefit every user.
